TEACHING & COURSE DEVELOPMENT EXPERIENCE

FALL 2020	Data Science for COVID-19 <i>Course Instructor</i> Created a course covering how a data scientist might approach the problems that arise in a global catastrophe like the COVID-19 pandemic. We had speakers from South Korea, England, and South Africa, as well as local scholars from the US. This international roster of speakers mirrored what was a fully international classroom; we had over 100 students hailing from 12 countries taking the class in 12 different timezones.
SUMMER 2020	Introduction to Data Analysis <i>Course Instructor</i> Designed and taught an introductory statistics course. Focused on making the difficult and sudden transition to remote learning as painless as possible for my students, while still demanding diligence and genuine mastery of the material.
SPRING 2020	Machine Learning <i>Teaching Assistant</i> Assisted a graduate-level Machine Learning class with Dr. Andrew Nobel. I wrote all computing assignments for this class using the R programming language.
