## TEACHING & COURSE DEVELOPMENT

---

AUG 2020	<b>Data Science for COVID-19</b> <i>Course Instructor</i> Created a course covering how a data scientist might approach the problems that arise in a global catastrophe like the COVID-19 pandemic. We had speakers from South Korea, England, and South Africa, as well as local scholars from the US. This international roster of speakers mirrored what was a fully international classroom; we had over 100 students hailing from 12 countries taking the class in 12 different timezones.
JUN 2020	<b>Introduction to Data Analysis</b> <i>Course Instructor</i> Designed and taught an introductory statistics course. Focused on making the difficult and sudden transition to remote learning as painless as possible for my students, while still demanding diligence and genuine mastery of the material.
JAN 2020	<b>Machine Learning</b> <i>Teaching Assistant</i> Assisted a graduate-level Machine Learning class with Dr. Andrew Nobel. I wrote all computing assignments for this class using the R programming language.

## COMMUNITY INVOLVMENT

---

NOV 2019	<b>AYA Cancer Advising Board</b>
JUN 2023	<b><i>Founding Member, Coordinator</i></b> I created a board of fellow young adult cancer survivors to oversee the development of a transfusion space specifically for Adolescent and Young Adults (AYAs) at the UNC Cancer Center. We advised the UNC Cancer Center on multiple projects and grant proposals.
AUG 2021	<b>Triangle Swing Dance Society</b>
FEB 2024	<b><i>Secretary</i></b> I was on the executive board for a non-profit business that plans monthly Swing Dancing events in the Triangle area. These events feature both local and national live musicians, and are supported by a strong, enthusiastic community of dancers. In addition to being an active voting member on our executive team, my duties involved managing communications with customers, organizing and documenting meetings, and helping produce the dances themselves.
